FORM FOR SHARING

CC (when complete) to the relevant team

Introduction

In legal terms, bulk data is defined as:

Datasets acquired under Section 2 (2)(e) of the Security Service Act 1989 or Sections 2(2)(a) or 4(2)(a) of the Intelligence Services Act 1994 which contain data about a wide range of individuals, including [non-adverse] data about individuals who are not of direct intelligence interest.

This form does not apply to data that does not match this definition. It should be used for the initial dissemination of a dataset but should not be used to justify subsequent updates, so long as this was identified and justified in the initial dissemination form.

This form provides a means for authorising data dissemination where this is not provided by other processes. Without the information captured by this form and approval from the relevant team, the relevant team will not export the data for any external systems. It may therefore be useful to use the other sections of the form to provide the relevant team with the information it needs to identify the data on their systems.
