Open Source Intelligence (OSINT)

INTRODUCTION

EUROPEAN UNION AGENCY FOR LAW ENFORCEMENT TRAINING
06/05/2019 – 10/05/2019 BUDVA, MONTENEGRO

What is OSINT?

- **Open Source Intelligence:** an intelligence gathering method which involves finding data in sources publicly, legally available for everyone and also analyzing it to be used in an intelligence context

Introduction

Allow myself to introduce...

Digital footprint

- Every action on the Internet leaves a trace behind
- At least a username, an e-mail address and a password is necessary almost everywhere
- Once it is there, it can be only hardly or never removed...

Intelligence gathering methods

- HUMINT – Human Intelligence
- MASINT – Measurement and Signature Intelligence
- GEOINT – Geospatial Intelligence
- SIGINT – Signals Intelligence
- TECHINT – Technical Intelligence
- MARKINT – Market Intelligence
- OSINT – Open Source Intelligence
- Etc.

OSINT vs. other intelligence gathering methods

Practical Exercises

OSINT vs. other intelligence gathering methods

- In other intelligence gathering methods the hardest part is **obtaining** the data while in OSINT the major difficulty is to **analyze and verify** it
- It became **essential** after the Internet explosion
- **90 %** of data processed by intelligence services is based on open sources

OSINT vs. other intelligence gathering methods

- **Advantages:**
 - Easy to access
 - Cheap or free
 - Big volume of data
 - Good chance to get information
 - Can be used without permission
 - Open sources usually record historical data too
- **Disadvantages:**
 - Time consuming
 - Needs new type of skills and knowledge
 - Big volume of data
 - Many fake information, the problem of reliability of data
 - You need other sources for verifying

OSINT methods

- **Passive:** no interaction with the target
„The quieter you become the more you are able to hear.“
(Ram Dass)
- **Active:** taking some intrusive steps is necessary to get the information (e.g. follow an Instagram profile, send a friend request or join a group on FB, etc.)

„The line between ACTIVE OSINT and HACKING is very thin.“
(Anybody who present OSINT)

What open sources do we have?

Choosing information sources

PRACTICAL
EXERCISES

Why is the Internet is the most important source?

- Easy to access
- Used by everyone – including criminals
- Timeless and timely
- The quantity of the data on the world wide web grows exponentially
- Contains everything mentioned before and a lot more
- There are types of data which could be obtained only from the web

Open sources

- Media: newspapers, magazines, radio, television...
- Public databases: libraries, universities, governmental bodies, NGOs, research facilities, private companies...
- Publications: governmental reports, studies, academic papers...
- Public conferences and other public events...
- **World Wide Web**

Exponential growth in the last two decades

JAN 2019

DIGITAL AROUND THE WORLD IN 2019

THE BEST NEWS IS THAT YOU NEED TO! KEEPING UP WITH MOBILE, INTERNET AND SOCIAL MEDIA USE

Hootsuite WE ARE SOCIAL

Source: www.wearsocial.com

What is a proxy?

- A proxy server acts as a middleman in your internet traffic, so that your internet activities appear to come from somewhere else.

What is a VPN?

- Virtual Private Network also makes your traffic appear as if it comes from somewhere else, but it is set up at the operating system level, so the VPN connection captures the entire network connection of your device.

Proxy vs. VPN

What is TOR?

- An encrypted network that gives anonymity for the users and requires a specific software to access it, probably the best solution for anonymity

KEEP
CALM
AND
LET'S GET
STARTED

What are the most important sources?

- Websites
- Online databases
- Instant message apps
- Photos, videos
- Search engines
- Maps
- Social Media
- Dark Web

Online Databases

- Company registers
- Phone number registers
- E-mail registers
- Username registers
- Online auction sites

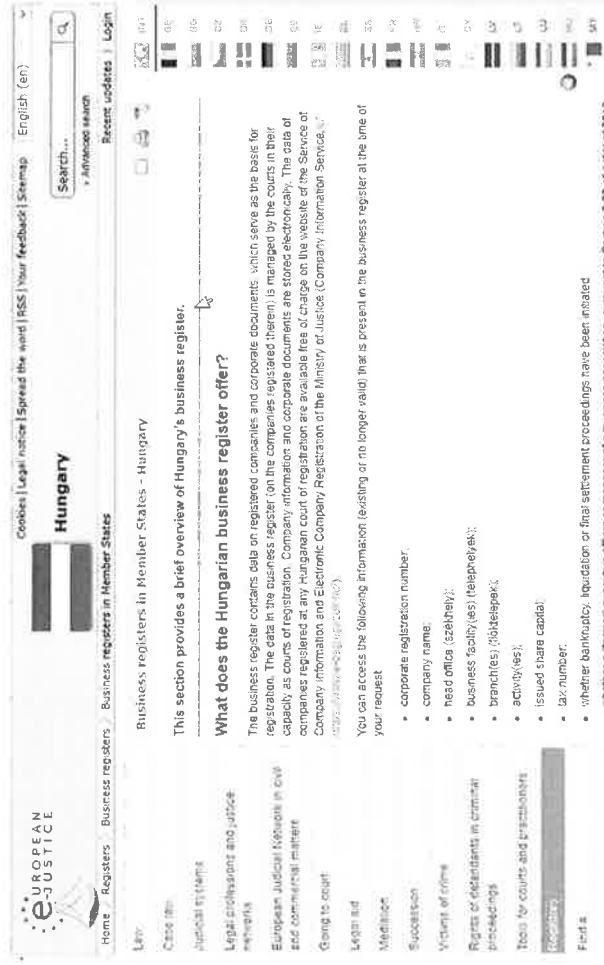

Online Databases

- **Company registers:** Information about the directors, shareholders, incorporation dates, annual reports, addresses, jurisdiction, connections...
- **www.opencorporates.com**
- **Tip:** try free tolls before paid services
- **Tool:** European e-Justice Portal – Company Registers (all EU members, in all EU languages)

opencorporates

Winner Open Data Business Award 2015

Find a company

Welcome to the "Find a company" section of the European e-Justice Portal. This allows you to search for and access company information from the national business registers.

In accordance with Directive 2017/1752 this service is to cover the business registers of all EU countries as well as Iceland, Lichtenstein and Norway. Not all of the Member States are currently connected, but more will be on board soon. If you are looking to access information and/or documents from those registers which are not yet part of the "Find a company" page, you can find links to the respective national registers on our "General information and terms and conditions" page.

Search criteria

Company name:

Company registration number:

SEARCH ENGINES

Search Engines

- **The BIG ONES:** Google, Bing (Yahoo), Yandex (Russia), Baidu (China)
- Special search engines:
 - Country based search engines
 - People search engines
 - Social media search engines
 - Deep Web search tools
 - Etc.
- **Tip:** always check Bing also
- **Tool:** use www.google.com/hcr (No Country Redirection)

Source: www.statista.com

Google Advanced Search (www.google.com/advanced_search)

Advanced Search

Find pages with

To do this in the search box, type the important words or symbols in quotes, or use other symbols:

- Put exclamation marks in quotes, "!", at the end.
- Type the address of the page you want, including the extension, if you know it.
- Put a period just before words that you don't want.
- Put two full stops between the numbers that add a unit of measurement.

Then narrow your results by:

- any language
- any region
- anytime

Find pages in the language that you select.

Find pages published in a particular region.

Find pages sorted by the time that you specify.

Google Search Operators

- Search for unknown words: * in your phrase where you want to leave a placeholder: *best nba * in the world*
- Combine searches: **OR** between each search query: *Shaq OR Shaquille*
- Search a specific site: **site:** in front of a site or domain: *site:nba.com or site:.gov*

Google Search Operators

- Search social media: @ in front of a word: *@twitter*
- Search for a price: \$ in front of a number: *Nike Kobe 11 \$200*
- Search hashtags: # in front of a word: *#hwapo*
- Exclude words from your search: - in front of a word you want to leave out: *jordan -basketball -nba -shoes*

Google Search Operators

- See Google's cached version of a site: **cache:** in front of the site address: *cache:www.gov.me*
- Search a specific filetype: **filetype:** in front of file extension: *filetype:.doc filetype:ppt*
- Search keyword in URL: **inurl:** in front of word: *inurl:nba*
- Define the meaning of a word: **define:** in front of word: *define:police*

EXERCISE 1.

- Search for Samsung laptop sold on www.vatera.hu

site:vatera.hu „samsung laptop”

EXERCISE 2.

- Search for MS Word documents on Montenegro Government official website

site:gov.me filetype:doc

PRACTICAL
EXERCISES

EXERCISE 3.

- Search for presentations on cybercrime on United Nations official website

site:un.org filetype:ppt "cybercrime”

EXERCISE 4.

- Search for documents on Montenegro Government official website related to money laundering

site:gov.me filetype:doc "money laundering”

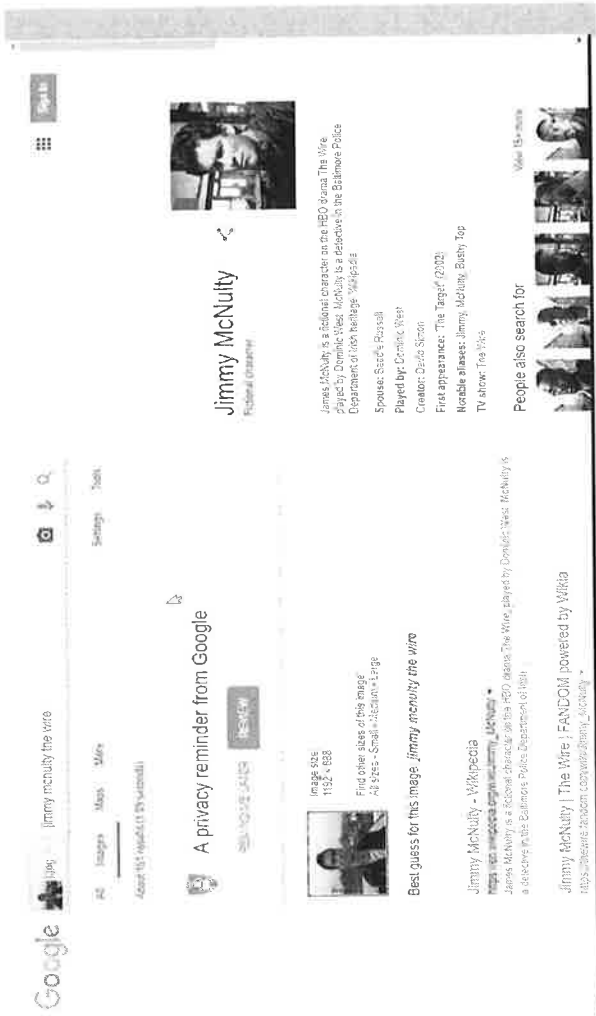

PRACTICAL
EXERCISES

Google Reverse Image Search (image.google.com)

- Search for similar images
- From a URL or upload an image
- Search by image works best when the image is likely to show up in other places on the web
- Only similar images, not the same images!
- Be careful! Any images you upload and search for might be stored by Google...

Google Alerts (google.com/alerts)

- Monitor the web for interesting web content
- You will get emails when new results for a topic show up in Google Search
- You can get info about news, products or mentions of a person
- You can set how often, how many, what language, what region, what sources, etc.

Google Alerts (google.com/alerts)

Alerts
Monitor the web for interesting new content

Lebron James

How often: At most once a day

Sources: Automatic

Language: English

Region: Any Region

How many: Only the best results

Enter email:

Clear Alert [See settings](#)

Google Translator (translate.google.com)

- We can simply translate what we want
- Usually identifies the language automatically
- Words, sentences, **even** a whole website
- App. 100 different languages (no Montenegrin, but Serbian is available)
- Far from perfect, but enough to get an idea...

Google Translate

Text Documents

DETECT LANGUAGE: ENGLISH SPANISH FRENCH SERBIAN ENGLISH SPANISH

We will have a break soon!

Ускоро ћемо имати паузу!

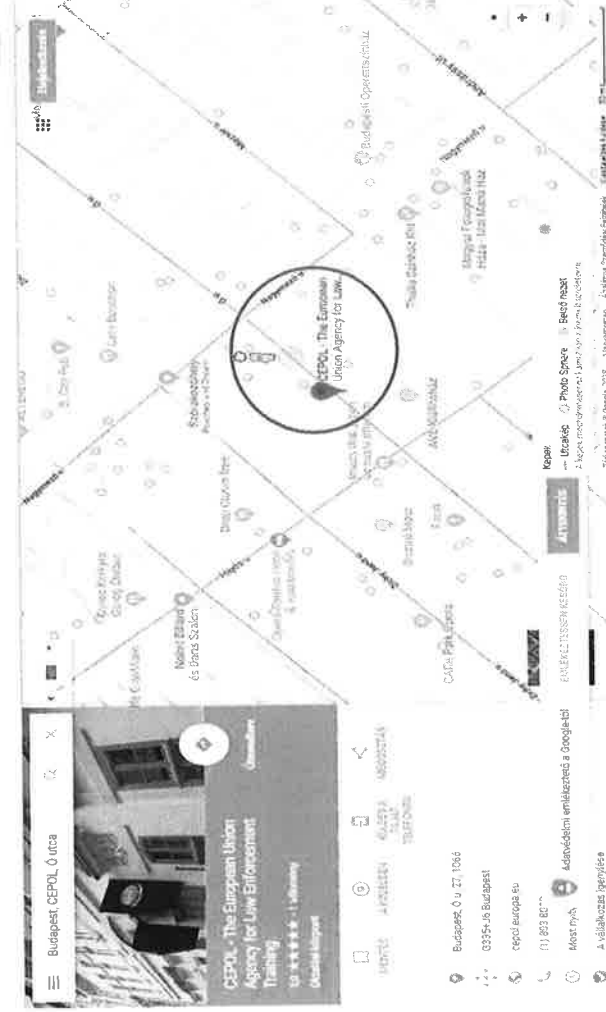

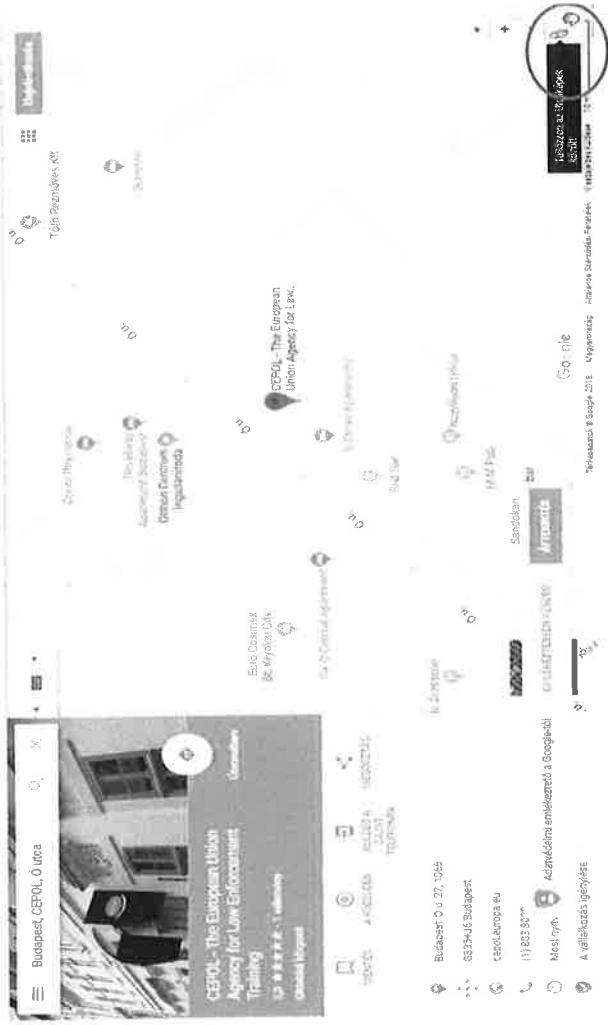

20:50:00

History Saved Community

Google Maps (maps.google.com)

- Google Maps and Google Earth, (Bing Maps)
- We can check almost any address without going out – even in the past
- Especially useful before an arrests and a house searches
- **Tip:** Always check the date at the left upper corner
- **Tool:** Google Street View and Google Maps Timeline

Social media for law enforcement

- The most important source, the backbone of every OSINT investigation
- We can obtain the most personal and up to date information about a target
- Nearly everybody was, is, or will be on some kind of a social media site
- **Tip:** check all the popular social media websites in your country
- **Tools:** Let's try some!

Source: www.facebook.com

Some statistics on Facebook users

- 87 % of online users of age 18-29 are on Facebook
- Half of them checks Facebook when they wake up
- The average time spent on Facebook per visit is 20 minutes
- Average Facebook user has 155 friends
- Average number of pages, groups and events a user is connected to is 80

Some statistics on Facebook content

- 350 million photos uploaded every day, with 4,000 uploads per second
- Every 20 minutes 1 million links are shared, 20 million friend requests and 3 million messages are sent
- 55 million status updates are made every day
- Every 60 seconds 1 million comments are posted

What kind of data can we obtain from social media sites?

- Personal information: age, birth place, addresses, education, recent and past workplaces, hobbies...
- Interpersonal relations: relatives, relationships, friends...
- Recent photos and videos of the person and his/her environment...
- Visited places and events...
- Religion, political views...
- Financial status, owned properties (car, house etc.), travels, hobbies...
- And so many more...

What types of content are on Facebook?

- **Personal profile**
- **Ad**
- **Page**
- **Group**
- **Event**
- **Marketplace**

If I'm not on
facebook
for more than 2 days..
...CALL THE POLICE!!!

Personal Profile

Personal Profile

- Timeline, About, Friends, Photos, More... (Videos, Check-ins, Sports, Movies etc.)
- The profile can be fully visible (public) or only partially visible (protected or private)
- **But:** some of the user actions cannot be made fully private (e.g.: liked photos)

Pages

- Used by businesses, organizations, celebrities, etc.
- They have some unique solutions like number of viewers, activities on the page, etc.
- **But:** a personal profile account is essential to create and host a page

Facebook Ad

Sponsored

Tudatosság és aktivitás a mindennapokban
Szerezd be a Quazar Clever Watch okosórát
MOST...

Facebook Group

- Members can share posts, media, documents
- Has at least one administrator
- Types of groups:
 - **Public:** Anyone can see the posts or join the group
 - **Closed:** Only members can see the posts, you have to join
 - **Secret:** You neither can see the group nor the posts, so it is not easy to join...

Facebook Event

- Has at least one host
- Types of events:
 - **Public:** Anyone can see the event, search for it or join to it, even if they are not friends with host
 - **Private:** Only invited users can see and join the event, host can choose to let guests to invite others

 CEPOL

 CEPOL

 CEPOL

 CEPOL

FACEBOOK User ID

- What we usually need:
 - As many information as we can get about our target
 - The name of a person is often not enough
- We need the user identification number („USER_ID“)
- Getting the „User_ID“:
 - Browser add-ons
 - Collect from the page's source
 - Collect it from the URL

 CEPOL

 CEPOL

 CEPOL

 CEPOL

 CEPOL

 CEPOL

 CEPOL

 CEPOL

But do not forget

- Profile can be suspended/banned by Facebook because of too much searches
- Facebook is able to log your searches
- Your activity on Facebook affects your searches
- Your location affects your searches
- Different users can get different results
- What works today, probably won't work tomorrow...

Source: www.statista.com

Instagram Profile

Instagram

- Photo/video sharing service
- Launched in 2010, acquired by Facebook in 2012
- Users can apply filters, add geotags, add hashtags
- About 800 million active users
- Few personal information
- Posts / Followers / Following / Images
- Focusing on user's (media) posts
- Can be shared directly into Facebook account
- Private profile: you cannot see any post unless you follow the profile owner

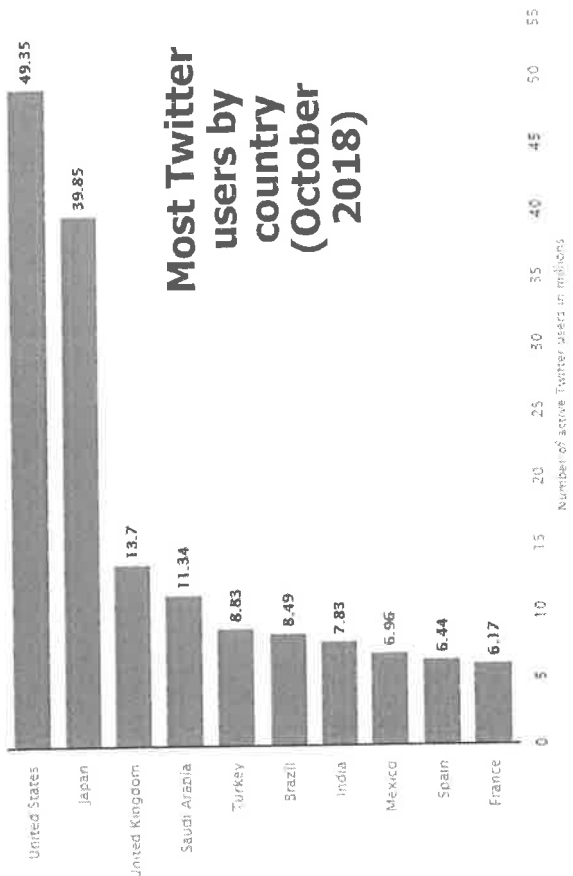

Twitter

- Launched in 2006 for online news and social networking
- 326 million monthly active users (2018 Q3)
- 500 Million tweets a day (2018 Q3)
- Tweets are publicly visible by default, but the user can set restrictions (for example only for subscribers)
- Tweets can be forwarded, this called retweeting
- Posts can be grouped through hashtags (*#something*)
- Retweeting and replying to others can be directly made via @ tag (*@username*)

Source: www.statista.com
